Youth Unemployment Rate Across Canada

(Ages: 15 to 24 Years)

Labour Force Participation Rate Across Canada

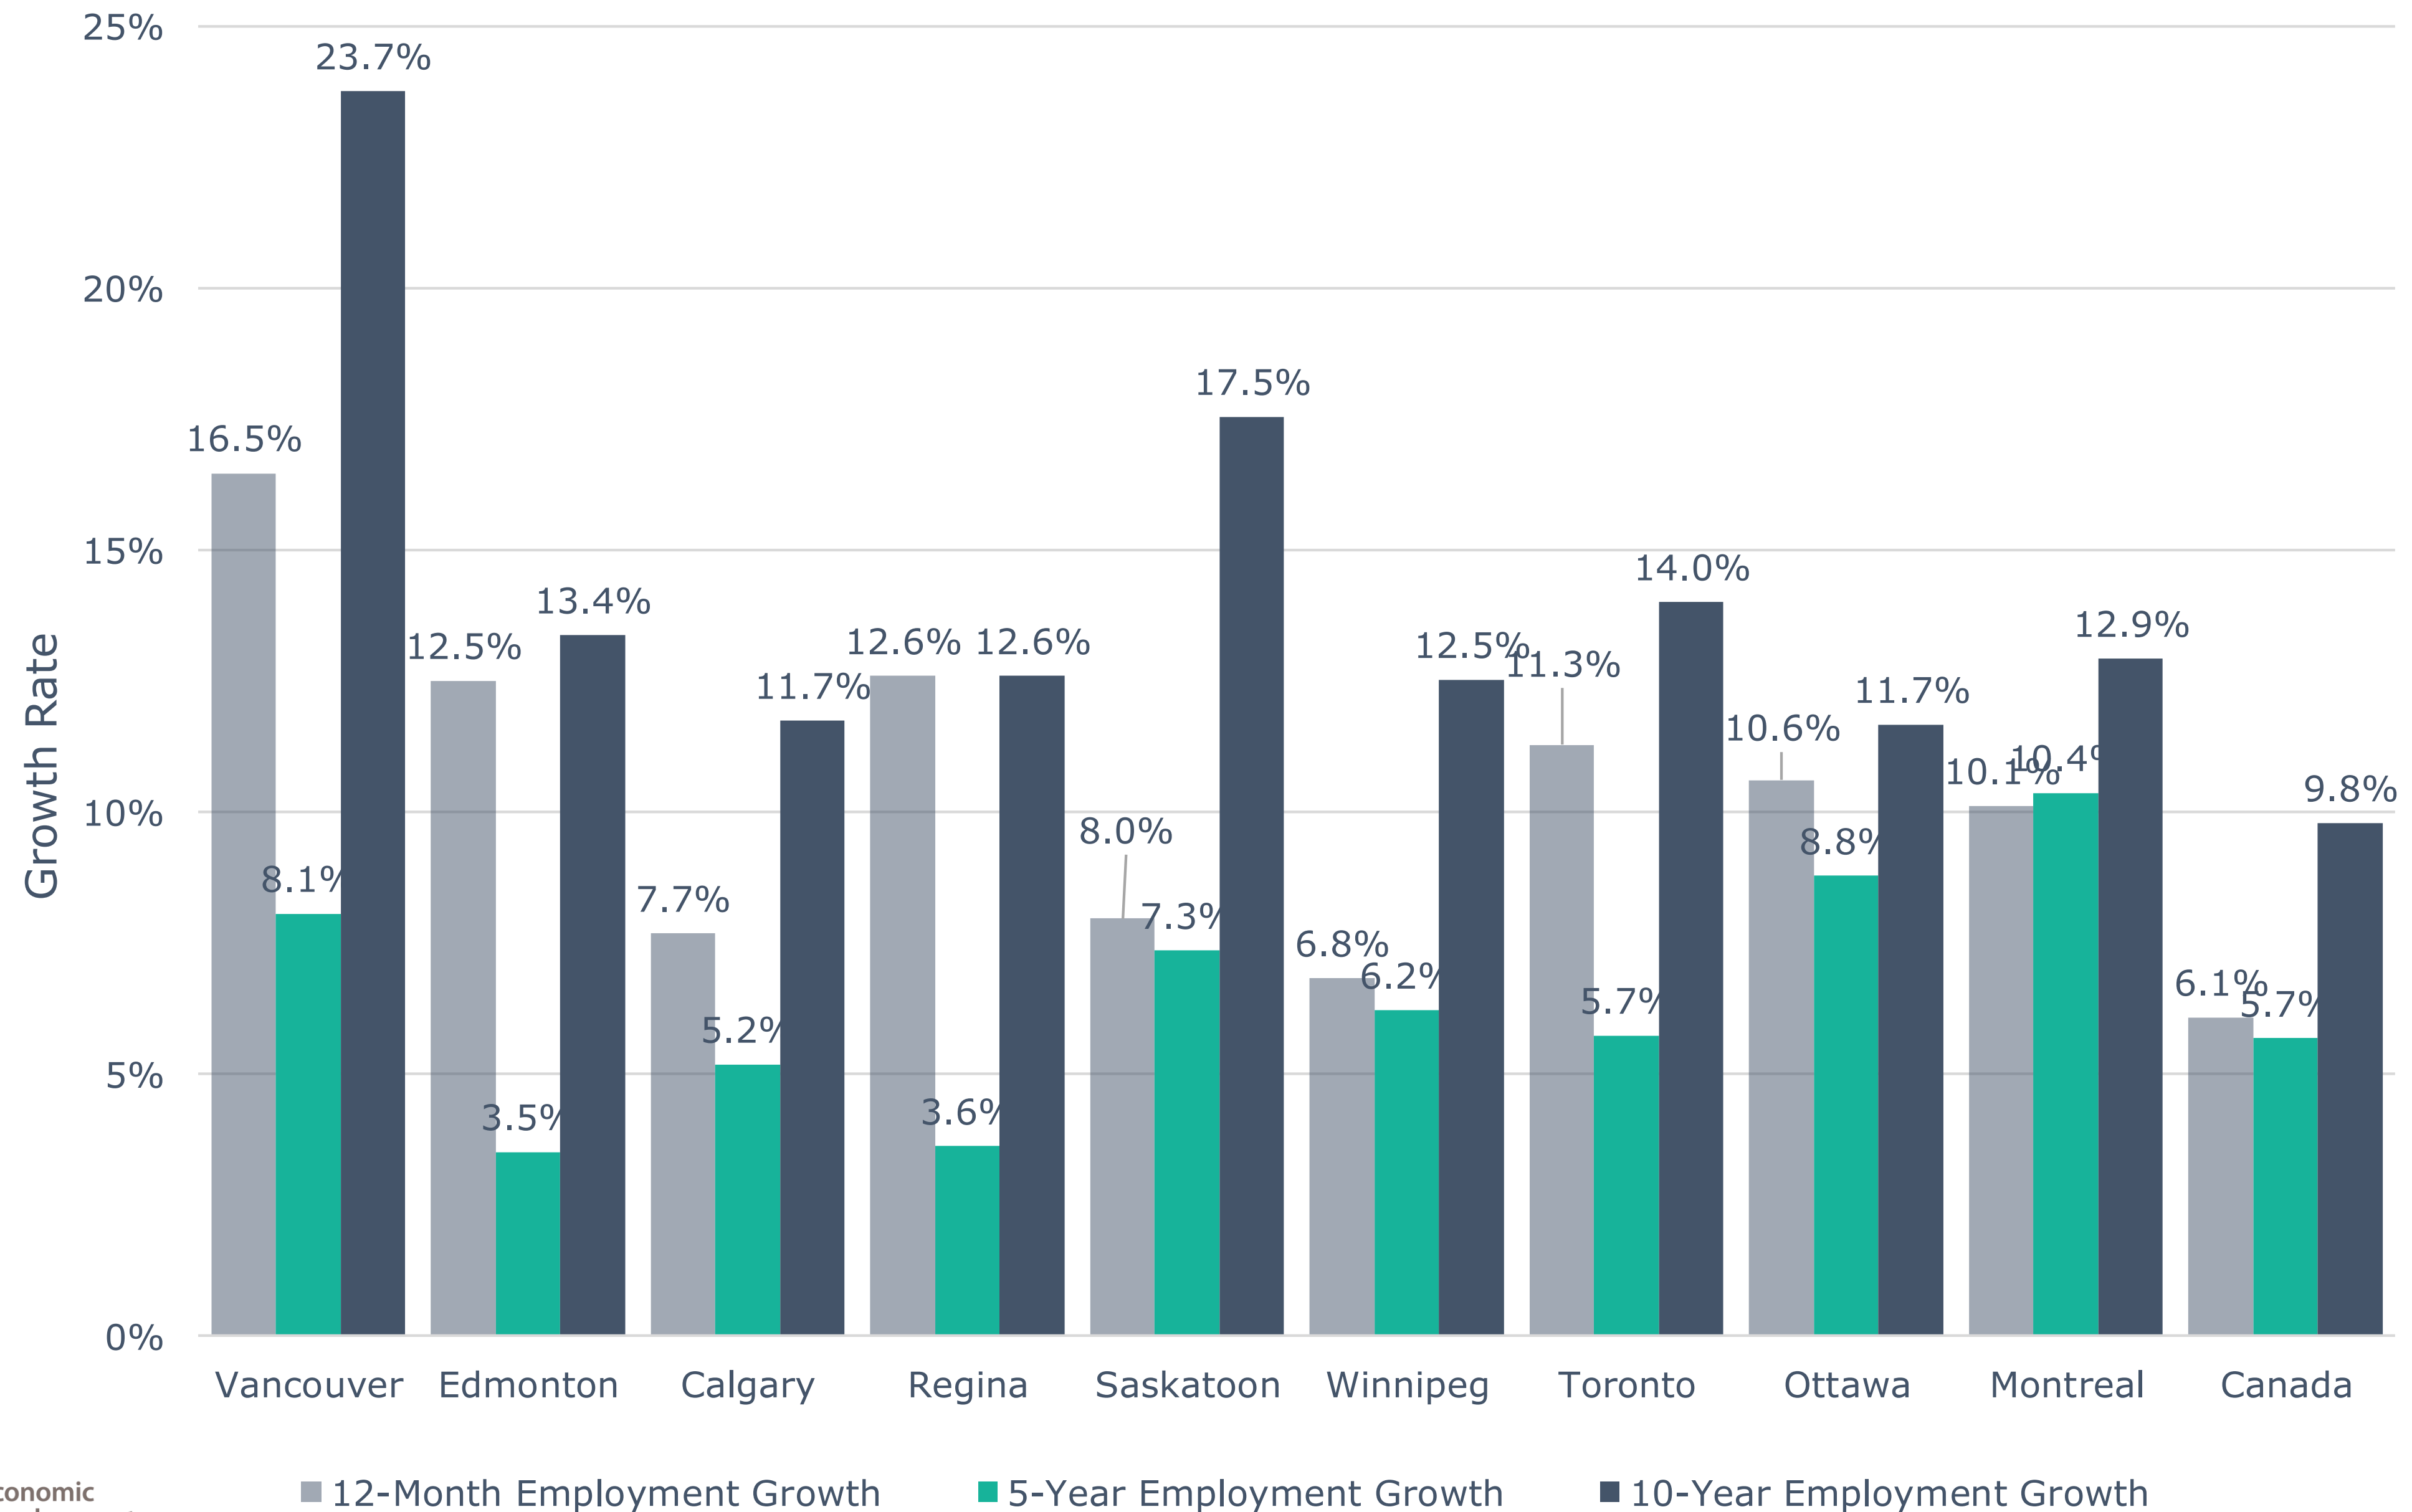

Highest labour force participation rate in Canada

Labour Force Growth Across Canada

The employed are persons having a job or business, whereas the unemployed are without work, are available for work, and are actively seeking work. Together the unemployed and the employed constitute the labour force. Persons not in the labour force are those who, during the reference period, were unwilling or unable to offer or supply labour services under conditions existing in their labour markets (this includes persons who were full-time students currently attending school).

Calgary's Economic Diversity

Economic Structure is a measure of **economic diversity**. Using the Hachman Index and employment by industry data, this measure benchmarks the economic structure of Calgary to that of Canada as a whole. The higher the number the higher the implied diversity in employment (highly diverse =1 and not diverse =0). For example, if Calgary's economic structure were exactly like Canada's then it would score a 1. If it were nothing like Canada's it would score a 0. We can say, **over the years Calgary has become more diverse in employment - more than it has ever been before!**

Labour Force Productivity
